CHRISTIAN D. WILSON
PRIMARY EXAMINER

Art Unit: 2891

1. Claims 1 – 24 are allowed.
2. The following is an examiner's statement of reasons for allowance: applicant claims in claims 1 and 4 a novel method of manufacturing a transistor. This method, in the context of the entire claim, comprises preparing a liquid material which forms a high order silane when photopolymerized and performing a thermal processing or photoirradiation process to transform a coating film formed from the liquid material into a silicon layer and a silicon oxide layer on the silicon layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art teaches methods of liquid deposition of silane materials, but they teach multiple deposition steps with thermal or photoirradiation processing between depositions instead of a single deposition and processing step to form the oxide and silicon stacked layer.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian Wilson whose telephone number is (571) 272-1886. The examiner can normally be reached on weekdays, 7:30 AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bill Baumeister can be reached on (571) 272-1722. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
